Reading Novels and Listening Musics.

RECENT PROJECTS:

Training Need Identification Portal | Jindal Stainless Limited

Developed a role-based web application to digitize employee training requests and streamline the training approval workflow across departments. Integrated Power BI dashboards to visualize department-wise training participation and analyze training categories for better decision-making and skill-gap identification.

Tech Stack: Next.js, .NET, SQL Server, Power BI, HTML5, CSS3, Bootstrap, JavaScript.

Bus Management System | *Jindal Stainless Limited*

Developed a paperless Bus Management System to automate bus company data management and employee pass generation by integrating DarwinBox API for automatic user data retrieval using employee codes.

Tech Stack: HTML5, CSS3, Bootstrap, JavaScript, C#, jQuery, AJAX, REST API.

Maintenance Portal | *Jindal Stainless Limited*

Developed a Maintenance Portal to automate complaint registration and tracking for furniture and accessory repairs. Integrated DarwinBox API for automatic employee data retrieval, eliminating manual entry and improving operational efficiency.

Tech Stack: HTML5, CSS3, Bootstrap, TailwindCSS, JavaScript, C#, REST API.

Energy Conservation Pledge & Quiz System | *Jindal Stainless Limited*

Engineered an interactive pledge and quiz platform for the Power Plant Department to promote energy conservation awareness, with efficient data management and optimized application performance.

Tech Stack: HTML5, CSS3, Bootstrap, JavaScript, C#, jQuery, AJAX, SQL Server.

Third Party Inspection Portal (Enhancement) | *Jindal Stainless Limited*

Enhanced the Third Party Inspection Portal to streamline product quality inspection for external agencies by implementing file upload and Batch Report Summary modules. Performed debugging and performance optimization to improve system stability and user experience.

Tech Stack: HTML5, CSS3, Bootstrap, JavaScript, C#, jQuery, AJAX, SQL Server.

Marelli Management System | *Wipro Technology*

Developed a secure authentication module for the Marelli project, enabling seamless access to enterprise applications for a European automotive manufacturer. Collaborated with cross-functional teams to integrate front-end and back-end components.

Tech Stack: HTML5, CSS3, Bootstrap, JavaScript, ASP.NET, Oracle.
